# INTRODUCING ROCKEY2

ROCKEY2 is one of the most cost effective software protection dongle with Global Unique Hardware ID. It can concurrently support multiple dongles working onto the same computer. With specially designed EEPROM structure, 2560 bytes user space can meet most client's requirement for storing more on chip data. ROCKEY2 is also a standard USB Interface based HID device, which is driverless under many platforms like Windows, Linux, etc. Shell Encryption Function is provided to encrypt EXE, DLL Files with broadly supported programming languages.

**Certificates** : Hardware Certificates : CE, FCC

**Application Fields** : Software Encryption, Software Protection, Anti-Piracy

**Data Storage Time** : Atleast 10 years

**Read/Write times** : Atleast 1,00,000 times

**ROCKEY2**

DRIVERLESS
2500 BYTES USER
ACCESSABLE MEMORY
MULTI - OS SUPPORTED
CE FCC CERTIFIED

## FEATURES

- USB Driverless Equipment

- Global Unique Hardware ID

- Shell Encryption Function

- 2560 Bytes User Space

- Multiple Platform Support : Windows 98, 2000, 2003, XP, Vista and Linux

- Multiple Software Interfaces : Delphi, Foxpro, Java, PB, VB6, VC6, Visual Studio .Net, etc.
